

BOB ICS Personalised Care Huddle

★★★ Save the Date! 20th June 2024: 14:00-15:30 ★★★

Venue: Virtually via ZOOM (link to be sent in due course)

The **Personalised Care Huddle** is a community of practice for health and care staff across the footprint of Buckinghamshire, Oxfordshire and Berkshire West

Join in to connect and share with each other about your work, projects, experiences and general musings in the realms of personalised care

Listen to spotlight presenters and discover how colleagues across the system embed a personalised care approach within their services

Personalised Care is everyone's business. Involving people in decisions about their care improves outcomes leading to greater satisfaction

Personalisation of systems and processes help ensure a more equitable approach to care provision thereby reducing inequality where patients access health services.

Personalised Care...

- ✓ Increases patient choice & control with their treatment and care
- ✓ Improves confidence with self-management thereby decreasing demand for services, reducing avoidable hospital visits/admissions and primary care appointments
